Feedback on your performance is printed below. The report lists the objectives for which you answered a question incorrectly.

- Compare and contrast the features and components of Java such as: platform independence, object orientation, encapsulation, etc.
- Create and manipulate Strings
- Create and manipulate calendar data using the following classes: `java.time.LocalDateTime`, `java.time.LocalDate`, `java.time.LocalTime`, `java.time.format.DateTimeFormatter`, `java.time.Period`
- Declare and initialize variables (including casting of primitive data types)
- Define the structure of a Java class
- Develop code that makes use of polymorphism; develop code that overrides methods; differentiate between the type of a reference and the type of an object
- Develop code that uses wrapper classes such as `Boolean`, `Double`, and `Integer`
- Import other Java packages to make them accessible in your code
- Know how to read or write to object fields
- Recognize common exception classes (such as `NullPointerException`, `ArithmeticException`, `ArrayIndexOutOfBoundsException`, `ClassCastException`)
- Use abstract classes and interfaces

If this is the final exam in your certification path, you are required to complete the following steps.

- Visit certification.oracle.com and select your certification path to ensure you are aware of all certification requirements.
 - Note that completion of the required training and approval of the course submission form are also required in paths that require training.
- Check certview.oracle.com to confirm that all completed components are in your profile.

- If exams that you have taken do not show up, you may have taken them under a different Oracle Testing ID.
- Contact www.pearsonvue.com/oracle/contact to merge your IDs (provide all IDs under which you have taken exams or submitted forms and confirm which ID should be the 'surviving id').
